SOFT SKILLS

Problem solving | Teamwork | Adaptability | Creativity

PROJECTS

Group Chat Webapp 🔗 source code 🔗 (Tech Stack : React, Node.js, Express.js, MongoDB, Socket.IO)
- A real-time messaging platform where users can connect, search for others, and join group conversations
- Enables secure login and seamless live chat for interactive communication
- Features : Sign-up/Login, Create Group, Add Friends, Real-Time Messaging
Areas of responsibility -
- Developed a real-time messaging application with user authentication, user search, and group chat functionality
- Built responsive UI components and integrated Socket.IO to enable live messaging
- Designed backend APIs and structured MongoDB data models to enable group creation and friend request functionality

Shopping Website 🔗 source code 🔗 (Tech Stack : HTML, CSS, JavaScript)
- An e-commerce platform for browsing and purchasing bath and body products
- Supports user authentication, cart management, and secure checkout
- Features: Sign-up/Login, Add to Cart, Checkout
Areas of responsibility -
- Collaboratively built a functional e-commerce platform featuring authentication, cart management, and checkout workflows
- Developed responsive navigation and footer components to enhance user experience across devices
- Performed application testing and resolved issues in the Add to Cart functionality to improve reliability
